AUTOMATIC ELASTIC RING ROBOT TRV-J210-MAE-70

- Electronic programmer **G-101-A**
- **SD Card** for memorizing up to 500 articles
- Electronic Sewing machine **Juki AMS-210EN**
- Sewing area **150x100 mm**
- **Rotatory** Thread break detector
- **Automatic Robot** for the elastic ring construction !
- Digital length measuring !
- Software with Auto-learning for programming!
- Elastic feeding through **DIGITENS 100**.
- Uncurling device for elastic coming from box
- Maximun elastic width **70 mm**.
- Pneumatic device Festo/Smc
- Sensors and photocells for automatic running
- Automatic discharge of the piece performed
- Automatic running without operator !
- **Performance: up to 7 elastic ring per minute !!**
- **Optional:**
 - Rotary stacker for the division size of the elastic ring !
 - Automatic label dispenser for label coming from roll !
 - Ultrasonic cutting device **for cut and weld the elastic up to 50 mm!**
 - Optical sensor reader to detect and place a mark in the center of the elastic !
- **Ironing Station with steam camera to press the elastic before the sewing Automation !**
